

FLUID AND GAS PUMPING SOLUTIONS

Design and engineering of fluid and gas pumping systems is the basis of the expertise of Fraser Pump and Engineering. The company has experience in design for hazardous and extreme environments, for many industrial sectors including upstream oil and gas production, petrochemical processes, wastewater, marine and food.

Industrial Systems

- Condensate recovery sets
- Centrifugal and reciprocating pumps and pumping systems
- Boiler feed pump sets
- Hydraulic pump sets and control systems
- Lubrication systems
- Pipeline pigging systems
- Hydraulic jacking sets
- Compressors and compressed air installations
- Product blending systems

Utility Systems

- Sewage and slurry pumps
- Storm water/surface water drainage pumps

Scientific/test Systems

- Metering and dosing pumps
- Pressure and vacuum test sets
- Vacuum pumps

General Systems

- Borehole and borehole pump installations
- Overhaul, repair and engineering maintenance services for large and small plant and installations
- Lake water environmental improvement
- Hydro-pneumatic water boosting pump sets
- Hydraulic and water flow consultancy

Our Clients Include:

BRITISH PETROLEUM
CORUS
MINISTRY OF DEFENCE
ASSOCIATED BRITISH PORTS
GENERAL MARITIME(LIBYA)
BRIDGESTONE GROUP
NE LINCOLNSHIRE COUNCIL
B.I.C.C.
NEW HOLLAND BULK SERVICES
NORSK HYDRO FERTILISERS
DEPARTMENT OF THE ENVIRONMENT
P.S.A.
ROYAL ORDNANCE PLC
HUMBER SHIP REPAIRERS
WEIR GROUP
VALERO INC
JEFCO SERVICES

SHELL(MALAYSIA)SDN
HYUNDAI HEAVY INDUSTRIES
DUNLOP (OIL AND MARINE)
NATIONAL RIVERS AUTHORITY
ADVANCED COMPOSITE TECHNOLOGY
HYGENA PACKAGING
BRAMALL CONSTRUCTION
YORKSHIRE WATER AUTHORITY
SCUNTHORPE ROD MILLS
